Evaluation of the fourth mobility of Erasmus+ project „Call of Poseidon“

Fourth mobility of Erasmus+ project „Call of Poseidon“ was in Šibenik, Croatia from 17th to 21st of October 2022. The name of the mobility was „Ocean Plastic Pollution“.

In the process of evaluation participated students, parents and teachers of all the schools in the project: IOS LOS Montecillos (Coin, Spain), Eduardo De Amicis (Tremestieri Etneo, Catania, Italia), British Junior (Eskilstuna, Sweden), OŠ Meterize (Šibenik, Croatia).

Teacher evaluation

Teachers from all 4 countries have filled in the evaluation form. The expectations are completely fulfilled, even more than that.

This is one of the statements from teachers:

„It was an amazing organisation and good fulfillment of all the activities. We learnt a lot about pollution of the seas.“

4. Rate these statements. (1 lowest mark, 5 the highest mark). (0 bod)

■ 1 ■ 2 ■ 3 ■ 4 ■ 5

My expectations are completely fulfilled.

All project activities are done.

I have learned a lot about Croatian culture and traditions.

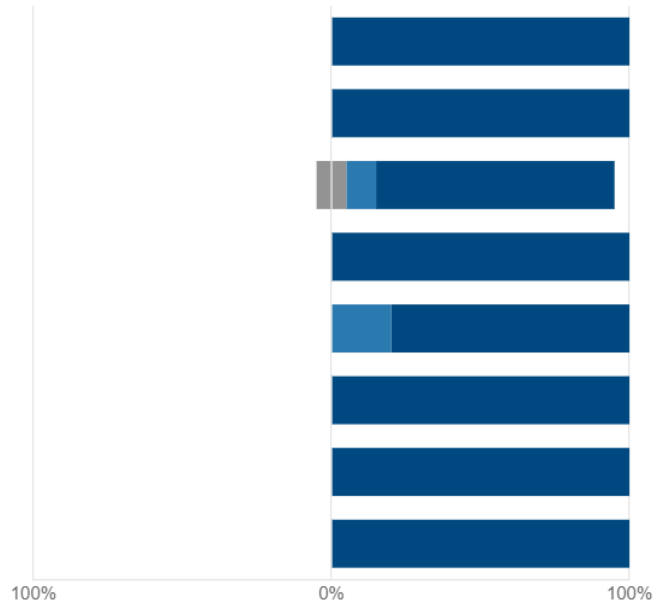

I have learned a lot about water in Šibenik.

I gained new knowledge.

The acquired knowledge can be used in practice.

Project "Call of Poseidon" is developing very good.

I have learned a lot how to protect oceans from plastic pollution.

Students evaluation

Students from all the countries are also very happy after these mobility. They say they liked this mobility very much and that they have learned a lot about Ocean plastic pollution.

5. What have you learned in this mobility that is in the connections with the theme of the project "Ocean plastic pollution"?

25 Odgovori

1	anonymous	I learned that we have to take more care of our seas because if we continue like this there will be no more seas.
2	anonymous	I learned that plastic is really bad for our earth and especially for our sea and if anyone can change that, it is our generation.
3	anonymous	I learned how to act properly so as not to get into a situation where they could run out of water. I also realized how important the oceans and seas are to us. Ocean pollution with plastic is also a big problem in Croatia as well as in European countries, and we should all take more care about it. After all this, the only thing I know is that our planet needs to change, and we are needed for that change!
4	anonymous	I learned that when we pollute our sea we actually pollute ourselves. I learned a lot about how different countries help to clean their sea.
5	anonymous	I learned more about the Adriatic Sea and the waters of the world. I know how important water is for our planet Earth and all life on it. Waste in the sea and on land, microplastics and overfishing are just some of the causes of water

Parents evaluation

Parents from the students of all countries are satisfied with the mobility in Croatia: with the hospitality of the hosts, all the activities that have been done, all the things their children have learned during the mobility in Šibenik.

3. Describe your impressions about this mobility (at least two sentences).

19 Odgovori

ID ↑	Naziv	Odgovori
1	anonymous	It was great!Children had very good fun!
2	anonymous	Great experience
3	anonymous	A very nice experience. It's nice to be with local children, wonderful friendships are made.
4	anonymous	It was an awesome experience and I am so glad that we had an opportunity to be host.
5	anonymous	Interesting, exciting and instructive
6	anonymous	A new experience, getting to know other cultures, learning through fun.
7	anonymous	Interesting and very good for learn english
8	anonymous	Great experience, very Nice people
9	anonymous	this experience was an opportunity for growth.

Conclusion

The results of the evaluation are a valuable indicator for the all schools that are in this project for further verification project activities, but also for the organization of the educational process and extracurricular activities.
